## Electroceutical Treatment Data

Statistical evaluation results of 2,560 medical practitioners on various pain syndromes (more than 8 million treatments)

### A. Pain occurring primarily in the region of the extremities

SUCCESS RATE %

<b>1. Pain involving degenerative tissue changes and trophic disturbances</b>	
1.1 Arthrodynia caused by arthrosis (arthropathy)	71.6
1.2 Scapulo-humeral peri-arthritis	72.9
1.3 Adhesive Capsulitis (frozen shoulder)	71.9
1.4 Sudeck's dystrophy	62.4
<b>2. Pain primarily from strain involving muscle, tendons, and bony insertion area</b>	
2.1 Tendonitis, tenosynovitis, tendovaginitis.	71.0
2.2 Epicondylitis	65.4
2.3 Tendomyosis ("muscular rheumatism")	74.7
2.4 Scapulo-costal syndrome	74.3
<b>3. Traumatic and post-traumatic pain (sports injury)</b>	
3.1 Contusions	88.8
3.2 Sprain, strain	85.8
3.3 Subluxation	80.8
<b>4. Neurogenic pain syndromes</b>	
4.1 Phantom-limb pain (pseudesthesia)	68.8
4.2 Reflex Sympathetic Dystrophy {RSD}, Stage I	79.5
Reflex Sympathetic Dystrophy (RSD), Stage 2	68.3
Reflex Sympathetic Dystrophy (RSD), Stage 3	53.7
4.3 Pain associated with Syringomyelia ("Morvan's syndrome")	53.4
4.4 Raynaud's syndrome	60.9

### B. Pain syndromes originating primarily in the vertebral region

<b>1. Radicular syndromes involving discopathy and spondylosis</b>	
1.1 Torticollis, acute wryneck	84.5
1.2 Myogelosis (circumscribed, pressure-sensitive muscle induration)	86.1
1.3 Cervico-brachial syndromes, cervical nerve root irritation	78.2
1.4 Thoracic or thorocospinal pain syndromes (lumbago, et cetera)	83.6
1.5 Nerve root irritation syndromes (sciatica, ischialgia, lumbosacral pain)	84.2
<b>2. Pain syndromes in the lower vertebral region</b>	
2.1 Sacroiliac strain and joint pain	75.7
2.2 Coccygodynia	67.5

### C. Pain syndromes occurring in various anatomical areas

<b>I. Pain in the innervation area of sensory nerves</b>	
1.1 Herpes Zoster ("shingles")	68.4
1.2 Intercostal neuralgia (Herpes Zoster)	64.9
1.3 Idiopathic neuralgia	64.7
